

SEED / SERIES A CONFIDENTIAL PRESENTATION

LIVE ON PRODUCTION

clinicalsaaslaunch.vercel.app

TheraFlow Clinical Platform

The Next-Generation Ambient AI Scribe, Local HIPAA Safe Harbor Engine & Practice Operating System for Behavioral Health.

4 INTEGRATED CLINICAL SUITES

100% CLIENT-SIDE SAFE HARBOR REDACTION

\$2.5M SEED ROUND

Unifying the Fragmented Mental Health Practice

TheraFlow replaces 4 to 6 disconnected point solutions with a single, privacy-first clinical operating system.

40%

CLINICIAN TIME LOST

Therapists spend over 15 hours each week on documentation, ICD/CPT coding, and claim generation.

100%

LOCAL-FIRST PRIVACY

All 18 HIPAA Safe Harbor identifiers are scrubbed in-browser before data ever touches cloud AI models.

\$45B

GLOBAL MARKET TAM

Rapidly expanding market for digital behavioral health infrastructure, telehealth, and AI scribing.

\$99

FLAGSHIP SAAS PRICING

Predictable, high-margin monthly subscription tiers (Starter \$49, Pro \$99, Enterprise \$199/seat).

Administrative Friction is Paralyzing Mental Health Care

Providers are drowning in non-clinical overhead while facing heightened privacy scrutiny and tool fatigue.

62% Clinician Burnout Rate

Therapists and psychiatrists spend 2 hours documenting for every 1 hour of patient therapy. Administrative exhaustion is driving clinicians out of practice amidst a severe national mental health shortage.

Extreme Tool Fragmentation

Clinicians currently juggle separate subscriptions: SimplePractice for EHR, Zoom for telehealth, Heidi/DAX for notes, and spreadsheets for billing. None of them communicate seamlessly.

Acute Cloud PHI Exposure

Standard cloud AI scribes require transmitting raw patient dialogue and acoustic recordings to remote LLM servers, exposing therapy clinics to immense HIPAA liability and patient confidentiality breaches.

The Unified Clinical Operating Loop

From intake to session, ambient transcription to de-identification, and insurance claim to reimbursement in one seamless platform.

1. Ambient Session Capture

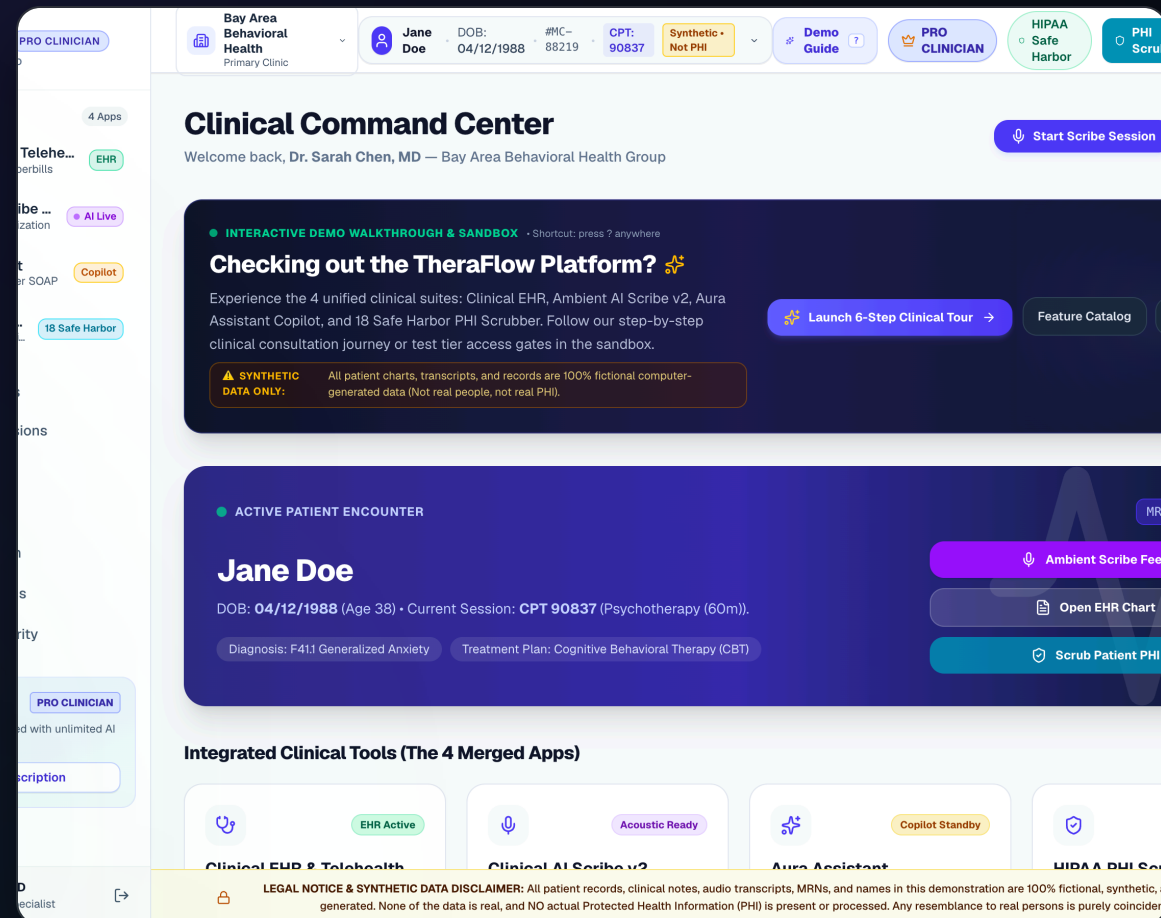

High-fidelity acoustic diarization listens during telehealth or in-person therapy, separating clinician from client without awkward prompt commands.

2. Zero-Trust Local PHI De-Identification

100% browser-local engine identifies and masks all 18 HIPAA Safe Harbor identifiers before note synthesis or LLM transmission.

3. Instant Note Formulation & Billing

Produces complete SOAP/DAP notes mapped directly to ICD-10 diagnostic codes and CMS-1500 procedural claim forms ready for reimbursement.

Ambient Acoustic Diarization & Note Synthesis

Captures natural clinical conversations, distinguishes speakers, and synthesizes structured medical documentation in seconds.

The screenshot displays the TheraFlow Clinical AI Scribe v2 interface. The top navigation bar includes the TheraFlow logo, user profile (Jane Doe), and various status indicators (PRO CLINICIAN, HIPAA Safe Harbor, PHI Scrubber, Aura Copilot). The left sidebar lists 'CORE CLINICAL TOOLS' (Clinical EHR & Telehealth, Clinical AI Scribe, Aura Assistant, HIPAA PHI Scrubber) and 'PRACTICE OPERATIONS' (Calendar & Sessions, Client Roster, Billing & Claims, Telehealth Room, HIPAA Audit Logs, Settings & Security). The main content area is titled 'Clinical AI Scribe v2' and features a 'Live Acoustic Transcript' showing a conversation between Dr. Chen and Jane Doe. Below the transcript is a 'Generated SOAP Preview' for CPT 90837, including a subject line, assessment, and a 'Send to PHI Scrubber' button. The interface also includes a 'Record Encounter' button and a 'Clinical Encounter Library & Simulation' section with filters for various medical specialties.

Multi-Speaker Diarization

Real-time acoustic analysis separates clinician and client channels with live dynamic audio waveforms and speaker attribution tags.

Specialty Documentation Library

Pre-configured templates for Psychiatric SOAP, Initial Diagnostic Intakes, DAP Notes, and Specialist Referrals with custom clinician prompt adjustments.

Enterprise EHR Interoperability

One-click bridge to push formatted notes directly into Epic Systems, Cerner, and HL7 FHIR-compliant hospital repositories.

100% In-Browser HIPAA Safe Harbor Redaction

The first clinical AI architecture that guarantees zero sensitive patient identifiers leave the clinician's browser unmasked.

Full 18 Statutory Categories

Detects names, locations, birthdates, SSNs, phone numbers, MRNs, biometric identifiers, device serials, and IP addresses automatically.

Zero Cloud Transmission

All de-identification regex and heuristics execute in client memory. No unmasked data is ever transmitted across public networks or stored on remote servers.

Interactive Diff & Forensic Ledger

Clinicians toggle between Tag [NAME], Block [REDACTED], and Asterisk masking with cryptographically verifiable tamper-evident audit logs.

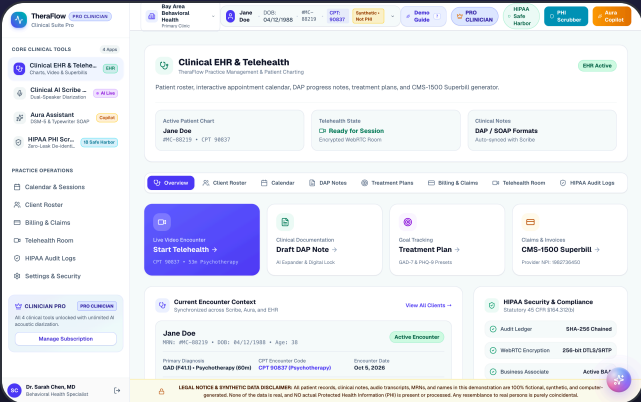

The screenshot displays the TheraFlow Clinical Suite Pro interface. The top navigation bar includes the TheraFlow logo, a 'PRO CLINICIAN' badge, and a patient profile for Jane Doe (DOB: 04/12/1988, #MC: 88219, CPT: 90837). The interface is divided into a left sidebar and a main content area. The sidebar contains sections for 'CORE CLINICAL TOOLS' (Clinical EHR & Telehe..., Clinical AI Scribe..., Aura Assistant, HIPAA PHI Scr...) and 'PRACTICE OPERATIONS' (Calendar & Sessions, Client Roster, Billing & Claims, Telehealth Room, HIPAA Audit Logs, Settings & Security). The main content area features the 'HIPAA PHI Scrubber' tool, which is active and shows a '18 Safe Harbor Active' status. It includes a 'Source Presets' section with 'Active Patient Encounter (Jane Doe)' selected, and a 'Commit Clean to EHR' button. Below this is a 'Synchronized Diff Viewer' showing a comparison between the 'Unredacted Clinical Source (Protected ePHI)' and the '18 Safe Harbor Redacted Output'. The redacted output shows the patient's name, DOB, and CPT code masked with [NAME], [DOB], and [CPT]. A 'LEGAL NOTICE & SYNTHETIC DATA DISCLAIMER' is visible at the bottom of the interface.

TheraFlow EHR, Encrypted Video & Aura Copilot

Full practice management infrastructure paired with an on-demand psychiatric diagnostic copilot.

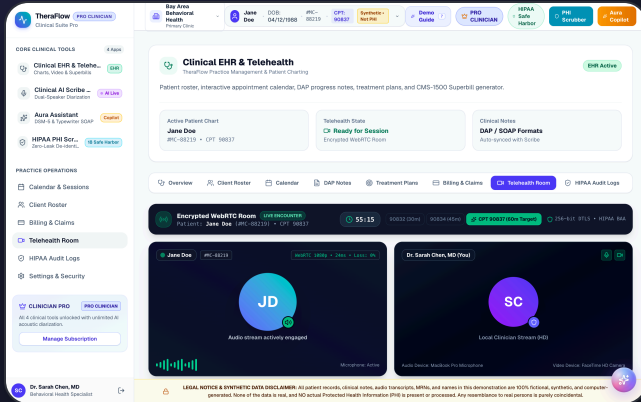

TheraFlow Clinical EHR

Client directories, appointment scheduling, treatment plans, longitudinal DAP note histories, and multi-site practice switching.

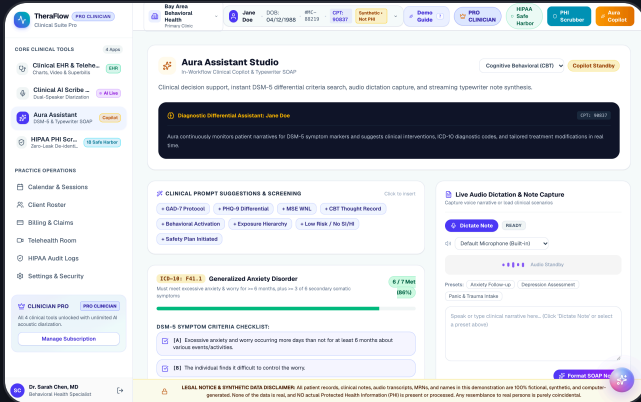

Encrypted Telehealth

Compliant WebRTC video consultations with hardware toggles, session timer, and side-by-side active note synchronizer.

Aura DSM-5 Copilot

Indexed diagnostic criteria search, clinical differential prompts, typewriter note formulation, and persistent action orb.

Closing the Loop: Note to CMS-1500 Superbill

CMS-1500 Superbill

Reimbursement Statement

Official statement for patient insurance reimbursement (HCFA-1500 / CMS-1500 Standard)

 Official CMS-1500 Claim Format

Generates standard electronic HCFA/CMS-1500 insurance claim forms with client demographics, payer IDs, and NPI attribution.

Automatic ICD-10 & CPT Linking

AI automatically maps documented therapeutic interventions to appropriate procedural codes (CPT 90834, 90837) and psychiatric diagnoses.

💰 Accelerated Reimbursement Cycle

Reduces claim rejection rates by validating diagnostic pointers and allowable fee schedules prior to submission.

A \$45 Billion Addressable Market in Transition

Behavioral health digital health spending is compounding at 18.2% CAGR as private practices adopt AI tooling.

\$45.2B

TOTAL ADDRESSABLE MARKET (TAM)

Global behavioral health EHR, practice management, telehealth, and clinical documentation software market.

\$9.8B

SERVICEABLE ADDRESSABLE MARKET (SAM)

US outpatient mental health providers, solo practitioners, and independent group behavioral health practices (130,000+ clinics).

\$1.4B

SERVICEABLE OBTAINABLE MARKET (SOM)

Tech-forward therapy practices, telehealth groups, and multi-clinician centers actively migrating from legacy EHRs to AI platforms.

Predictable, High-Margin B2B SaaS Subscriptions

Tiered seat-based licensing designed for seamless expansion from solo practitioners to multi-site clinical organizations.

SOLO PRACTITIONER

Clinician Starter

\$49 /mo

- ✓ Full TheraFlow EHR Client Roster
- ✓ Encrypted Telehealth Video Room
- ✓ Basic Audit Trail & Scheduling
- ✓ 10 Monthly Superbill Claims

MOST POPULAR

Clinician Pro

\$99 /mo

- ✓ All Starter Features Included
- ✓ Unlimited Ambient AI Scribe v2
- ✓ 100% Local HIPAA PHI Scrubber
- ✓ Aura DSM-5 Diagnostic Copilot
- ✓ Template Studio & Unlimited Superbills

FLAGSHIP TIER

CLINICS & CENTERS

Group Enterprise

\$199 /seat/mo

- ✓ All Clinician Pro Features
- ✓ Multi-Site Practice Switcher
- ✓ Enterprise EHR Export (Epic, Cerner)
- ✓ Centralized Billing & Supervisor Approvals

How TheraFlow Outperforms Point Solutions

Combining practice management, ambient AI scribing, zero-trust privacy, and automated billing into a single subscription.

Production-Ready & Fully Demonstrated

Not a mockup — a fully functional, cloud-deployed clinical web application operating live on Vercel.

Live Vercel Deployment

Accessible globally at
clinicalsaaslaunch.vercel.app
with instant demo credentials and
sandbox modes.

Comprehensive Test Suite

Passing end-to-end tests covering
auth redirection, subscription gating,
adversarial security audits, and EHR
integrity.

Built-In Demo Guide

Integrated 4-tab evaluator modal
with step-by-step clinical
walkthrough, feature directory, and
HIPAA Safe Harbor reference.

Full Video & PDF Assets

83-second automated MP4 demo
video and 16-page technical
screenshot portfolio published to
GitHub.

Engineering & Commercial Roadmap

Executing our phased expansion from clinician ambient notes to enterprise clearinghouse connectivity.

Q4 2026 • COMPLETED

Production Launch

Core 4 clinical suites live on Vercel. 100% in-browser Safe Harbor scrubber, ambient diarization, CMS-1500 generation, and Stripe sandbox.

Q1 2027 • IN PROGRESS

Direct EDI Clearinghouse

Direct EDI 837P / 835 claim filing integration with major commercial payers (Change Healthcare, Availity) for zero-friction claim submission.

Q2 2027 • PIPELINE

Mobile Ambient App

Native iOS and Android ambient dictation companion app for in-person consultations, home visits, and multi-clinician ward rounds.

Q3 2027 • VISION

Outcome Analytics

Measurement-based care metrics (PHQ-9, GAD-7) trended longitudinally to empower value-based reimbursement and clinical oversight.

Partner With Us to Modernize Behavioral Health

Accelerating product development, enterprise clinic integrations, and nationwide practice acquisition.

50% — Engineering & AI Infrastructure

EDI 837P clearinghouse integrations, proprietary acoustic models fine-tuned on psychological dialogues, and mobile companion apps.

30% — Go-To-Market & Practice Sales

Targeted acquisition of private therapist networks, group mental health practices, and partnership with psychiatric training institutions.

20% — Regulatory & Compliance Hardening

SOC2 Type II audit completion, HITRUST certification, and continuous legal monitoring for state-by-state telehealth regulations.

Connect With the Team

We would welcome the opportunity to walk through the live product, share deeper unit economics, and review our clinical pilot pipeline.
